

Erase and Restore Macs at Scale

Large Scale Deployment of Apple Silicon Macs

∴ ACRONAME

DFU Blaster Pro plus Acroname Kit for Automating Apple Device Restore enables automatic secure erasing, restoring Macs for deployment, and rapid return-to-service using Apple tooling. Update to the latest OS, or specify custom images, all without manual intervention.

Features

- Automatically restore up to 10 Macs at once from a single Mac mini host (with two kits).
- Erase and restore **10 Macs** in less than **40 minutes**.
- Supports all Macs with Apple Silicon.
- Locking USB-C cables to secure to hub.
- USB Power eliminates Mac power adapters (up to 45 W charging per Mac with a 280-watt power supply).
- Securely Erase and Restore macOS.
- Install Software and Initial Configuration with MDS.

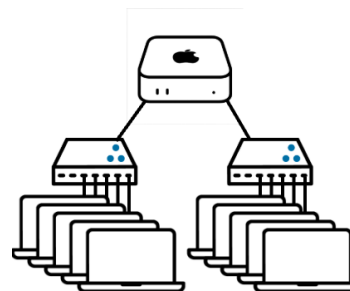

Benefits

- **Save time and keystrokes:** Work in batches instead of machine-by-machine.
- **Scalable:** Expand from 5 to 10 devices per host using additional kits.
- **Easy Management:** Manage the restore process from one app.

Real World Applications

DFU Blaster Pro with Acroname Kit is ideal for deploying Macs anywhere at any scale.

- **Enterprise IT:** Securely redeploy Macs company-wide.
- **Education:** Quickly restore computer labs, classroom devices, or student machines.
- **Small Business:** Rapid, hassle-free resets for any size of deployment.
- **Refurbishment:** Erase and restore any Apple Silicon Mac, regardless of the current state.

Reliable, Consistent, Scalable

- Single integrated solution.
- Tested with a wide variety of Mac systems with Apple Silicon.
- Expand your deployments by adding hubs, stations, or locations easily.

Solution Components

Software: DFU Blaster Pro, MDS, and all the software to successfully erase and restore Mac systems at scale.

Hardware: Acroname Kit for Automating Apple Device Restore. Cables and power supply included.

Support: Premium support to make your real-world deployments successful.

Training: Documentation, online, and video training for all your staff.
