ACRONAME

FEDERAL CAPABILITIES STATEMENT

Programmable USB Connectivity Solutions for Test & Measurement, IT, and Pro AV Applications

COMPANY OVERVIEW

Founded in 1994, Acroname, a Valens Semiconductor company, develops programmable, industrial-grade USB hubs, switches, and extenders that simplify how organizations connect, manage, and scale USB systems.

Serving commercial and government markets, Acroname products support Test & Measurement, IT, and Professional AV applications.

Acroname products include HubTool, a graphical user interface (GUI) that provides real-time visibility and interactive control of USB connections. In addition, Acroname's BrainStem API enables integration with automated test platforms and software-defined control of USB connectivity, Power Delivery, and test workflows.

Programmable interfaces enable precise, remote management of individual USB ports, including enabling, disabling, and power-cycling connected devices.

Acroname's portfolio also includes USB cables and manufacturing test modules.

CORE COMPETENCIES

- Automated Device Testing & Validation
- USB-C Power Delivery Testing & Control
- Programmable USB Connectivity & Switching
- Manufacturing Test Automation
- USB Port Access Control & Remote Management
- Managed USB Extension for AV & IT Systems
- Software-Defined Control & API Integration
- Independent USB, Ethernet & RS-232 Control Interfaces

FEDERAL APPLICATIONS

- Defense & Aerospace Testing
- Government & Enterprise IT
- Research & Development Laboratories
- AV & Collaboration Solutions
